Progression of Knowledge and Skills: Geography

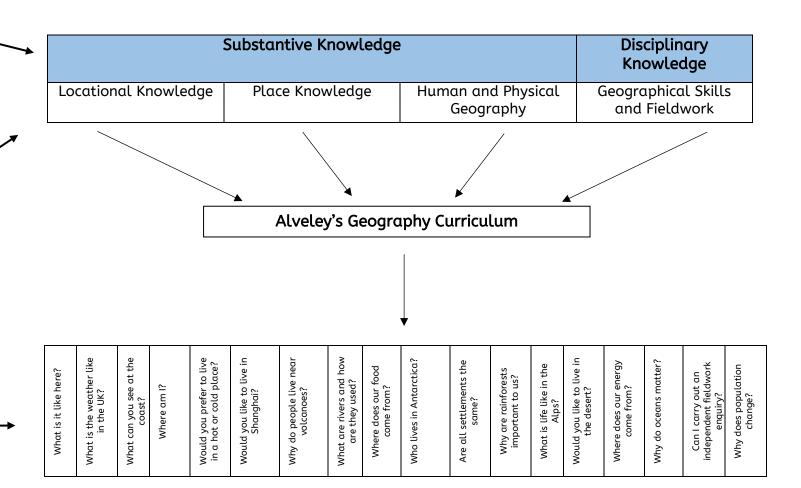

1. This is the overarching knowledge that underpins our whole geography curriculum. Substantive and disciplinary.

2. This knowledge is then broken into five skill strands: Locational Knowledge, Place Knowledge, Human and Physical Geography and Geographical Skills and Fieldwork

Each of these skills will be incorporated and built upon during each of the units of art explained below.

3. Finally, we arrive at the units of geography that are studied.

Each of these units contains the five skill strands, as explained above. This means that every unit of art gives pupils the chance to practise their Locational Knowledge, Place Knowledge, Human and Physical Geography and Geographical Skills and Fieldwork

Locational Knowledge

Year 1/2	Year 3/4	Year 5/6
-Locating all the world's seven continents	-Locating some countries in Europe and North and South America using maps.	Locating more countries in Europe and North and South
on a world map.	-Locating some major cities of the countries studied.	America using maps.
-Locating the world's five oceans on a	-Locating some key physical features in countries studied on a map including significant	Locating major cities of the countries studied.
world map.	environmental regions.	Locating key physical features in countries studied on a
-Showing on a map the oceans nearest the	-Locating some key human features in countries studied.	map .
continent they live in.	-Locating the world's most significant mountain ranges on a world map and identifying any patterns.	Locating key human features in countries studied.
-Showing on a map which continent they	-Locating where the world's volcanoes are on a map and identifying the 'Ring of Fire'.	Identifying significant environmental regions on a map.
live in.	-Locating some of the world's most significant rivers and identifying any patterns.	Using maps to show the distribution of the world's
-To be able to name the seven continents of	-To know where North and South America are on a world map.	climate zones, biomes and
the world.	-To know the names of some countries and major cities in Europe and North and South America.	vegetation belts.
-To know that a continent is a group of	-To know the names of some of the world's most significant mountain ranges.	To know the name of many countries and major cities in
countries.	-To know the names of some of the world's most significant rivers.	Europe and North and
-To know that they live in the continent of	-To know that mountains, volcanoes and earthquakes largely occur at plate boundaries.	South America.
Europe.	-To know that climate zones are areas of the world with similar climates.	To know the location of key physical features in
-To know that an ocean is a large body of	-To know the world's different climate zones (equatorial, tropical, hot desert, temperate and polar).	countries studied.
water and that a sea is a body of water	-To know that biomes are areas of world with similar climates, vegetation and animals.	To name and describe some of the world's vegetation
that is smaller than an ocean.	-To know the world's biomes.	belts (ice cape, tundra,
-To be able to name the five oceans of the	-To know vegetation belts are areas of the world which are home to similar plant species.	coniferous forest, deciduous forest, evergreen forest,
world.	-Locating some counties in the UK (local to your school).	mixed forest, temperate
-Locating the four countries of the United	-Locating some cities in the UK (local to your school).	grassland, tropical grassland, mediterranean, desert
Kingdom (UK) on a map of this area.	-Identifying key physical and human characteristics of counties, cities and/or geographical regions in	scrub, desert, highland).*
-Showing on a map which country they live	the UK.	Locating many counties in the UK.
in and locating its capital city.	-Beginning to locate the twelve geographical regions of the UK.	Locating many cities in the UK.
-Locating the surrounding seas and oceans	-Identifying how topographical features studied have changed over time using examples.	Confidently locating the twelve geographical regions of
of the UK on a map of this area.	-Describing how a locality has changed over time, giving examples of both physical and human	the UK.
	features.	

- -Locating the capital cities of the four countries of the UK on a map of this area.
- -Identifying characteristics (both human and physical) of the four capital cities of the UK.
- -Showing on a map the city, town or village where they live in relation to their capital city.
- -To know that the UK is short for 'United Kingdom'.
- -To know that a country is a land or nation with its own government.
- -To know that the United Kingdom is made up of four countries and their names.
- -To know the name of the country they live in.
- -To know that there are four bodies of water surrounding the UK and to be able to name them.
- -To name some characteristics of the four capital cities of the UK.
- -To know the four capital cities of the UK.
- -To know that a capital city is the city where a country's government is located.

- -To know the name of some counties in the UK (local to your school).
- -To know the name of some cities in the UK (local to your school).
- -To know the name of the county that they live in and their closest city.
- -To begin to name the twelve geographical regions of the UK.
- -To know the main types of land use.
- -To know some types of settlement.
- -Finding the position of the Equator and describing how this impacts our environmental regions.
- -Finding lines of latitude and longitude on a globe and explaining why these are important.
- -Identifying the position of the Tropics of Cancer and Capricorn and their significance.
- -Identifying the position of the Northern and Southern hemispheres and explaining how they shape our seasons.
- -Identifying the position and significance of both the Arctic and Antarctic Circle.
- -To know that countries near the Equator have less seasonal change than those near the poles.
- -To know that the Equator is a line of latitude indicating the hottest places on Earth and splitting our globe into the Northern and Southern Hemispheres.
- -To know lines of longitude are invisible lines on the globe that determine how far east or west a location is from the Prime Meridian.
- -To know lines of latitude are invisible lines on the globe that determine how far north or south a location is from the Equator.
- -To know the Tropics of Cancer and Capricorn are lines of latitude and mark the equatorial region; the countries with the hottest climates.
- -To know the Northern and Southern hemisphere are 'halves' of the Earth, above and below our Equator and have alternate seasons to each other.
- -To know the boundaries of the polar regions are marked by the invisible lines the Arctic and Antarctic circle.
- -To know the patterns of daylight in the Arctic and Antarctic circle and the Equatorial regions.

Identifying key physical and human characteristics of the

geographical regions in the UK.

Understanding how land-use has changed over time using examples.

Explaining why a locality has changed over time, giving examples of

both physical and human features.

To know the name of many counties in the UK.

To know the name of many cities in the UK.

To confidently name the twelve geographical regions of the UK.

To know that London and the South East regions have the largest

population in the UK.

Identifying the location of the Prime/Greenwich Meridian and time zones

(including day and night) and explaining its significance.

Using longitude and latitude when referencing location

globe.

in an atlas or on a

To know the Prime/Greenwich Meridian is a line of longitude which goes

through 0° and determines the start of the world's time zones.

Place Knowledge

Year 1/2	Year 3/4	Year 5/6
-Naming and beginning to describe some key similarities between	-Describing and beginning to explain similarities between two regions	-Describing and explaining similarities between two
their local area and a small area of a contrasting non-European	studied.	environmental regions studied.
country.	-Describing and beginning to explain differences between two regions	-Describing and explaining differences between two

-Describing what physical features may occur in a hot place in	-Discussing how climates have an impact on trade, land use and	-Understanding how climates impact on trade, land use and
comparison to a cold place.	settlement.	settlement.
-To know that life elsewhere in the world is often different to	-Explaining what measures humans have taken in order to adapt to	-Explaining how humans have used desert environments.
theirs.	survive in cold places.	-Using maps to explore wider global trading routes.
-To know that life elsewhere in the world often has similarities to	-Describing and explaining how people who live in a contrasting	-To know some similarities and differences between the UK and
theirs.	physical area may have different lives to people in the UK.	a European mountain region.
-To know some similarities and differences between their local	-To know the negative effects of living near a volcano.	-To know why tourists visit mountain regions.
area and a contrasting non-European country.	-To know the positive effects of living near $\boldsymbol{\alpha}$ volcano.	
	-To know the negative effects an earthquake can have on a community.	
	-To know ways in which communities respond to earthquakes.	

Human and Physical Geography

Year 1/2	Year 3/4	Year 5/6
-Describing how the weather changes with each season in the UK.	-Mapping and labelling the seven biomes on a world map.	-Describing and understanding the key aspects of the six
-Describing the daily weather patterns in their locality.	-Understanding some of the causes of climate change.	biomes.
-Confidently using the vocabulary 'season' and 'weather'.	-Describing how physical features, such as mountains and rivers are	-Describing and understanding the key aspects of the six
-Locating some hot and cold areas of the world on a world map.	formed, and why volcanoes and earthquakes occur.	climate zones.
-Locating the Equator and North and South Poles on a world	-Describing where volcanoes, earthquakes and mountains are located	-Understanding some of the impacts and causes of climate
тар.	globally.	change.
-Locating hot and cold areas of the world in relation to the	-Describing and explaining how physical features such as rivers,	-Describing and understanding the key aspects and distribution
Equator and the North and South poles.	mountains, volcanoes and earthquakes have had an impact upon the	of the vegetation belts in relation to the six biomes, climate and
-To know the four seasons of the UK.	surrounding landscape and communities.	weather.
-To know that 'weather' refers to the conditions outside at $\boldsymbol{\alpha}$	-Describing how humans use water in a variety of ways.	-Giving examples of alternative viewpoints and solutions
particular time.	-To know that the water cycle is the processes and stores which move	regarding an environmental issue and explaining its links to
-To know that different parts of the UK often experience different	water around our Earth and to be able to name these.	climate change.
weather.	-To know the courses and key features of a river.	-To know vegetation belts are areas of the world that are home
-To know that a weather forecast is when someone tries to	-To know the different types of mountains and volcanoes and how they	to similar plant species.
predict what the weather will be like in the near future.	are formed.	-To name and describe some of the world's vegetation belts.
-To know that weather conditions can be measured and recorded.	-To know that an earthquake is the intense shaking of the ground.	-To know why the ocean is important.
-To know that the Equator is an imaginary line around the middle	-To know that a biome is a region of the globe sharing a similar	-Describing and understanding economic activity including trade
of the Earth.	climate, landscape, vegetation and wildlife.	links.
-To know that, because it is the widest part of the Earth, the	-To know the world's biomes.	-Suggesting reasons why the global population has grown
Equator is much closer to the sun than the North and South poles.	-To know that the hottest biomes are found between the Tropics of	significantly in the last 70 years.
-To know that the North Pole is the northernmost point of the	Cancer and Capricorn.	-Describing the 'push' and 'pull' factors that people may
Earth and the South Pole is the southernmost point of the Earth.	-To know that climate zones are areas of the world with similar	consider when migrating.
-To know that different parts of the world experience different	climates.	-Understanding the distribution of natural resources both
weather conditions and that these are often caused by the	-To know the world's different climate zones.	globally and within a specific region or country studied.
location of the place.	-To know that climates can influence the foods able to grow.	-Recognising geographical issues affecting people in different
	-Describing and understanding types of settlement and land use.	places and environments.

- -Recognising and describing some physical features of a location using subject-specific vocabulary.
- -To know that physical features means any feature of an area that is on the Earth naturally.
- -To know that coasts (and other physical features) change over time.
- -To know some key physical features of the UK.
- -Recognising and describing some human features of a location using subject-specific vocabulary.
- -Describing and understanding the differences between a city, town and village.
- -To know that human features means any feature of an area that was made or built by humans.
- -To know that a sea is a body of water that is smaller than an ocean.
- -To know that human features change over time.
- -To know some key human features of the UK.

- -Explaining why a settlement and community has grown in a particular location.
- -Explaining why different locations have different human features.
- -Explaining why people might prefer to live in an urban or rural place.
- -Describing how humans can impact the environment both positively and negatively, using examples.
- -To know the main types of land use.
- -To know the different types of settlement.
- -To know water is used by humans in a variety of ways.
- -To know an urban place is somewhere near a town or city.
- -To know a rural place is somewhere near the countryside.
- -To know that a natural resource is something that people can use which comes from the natural environment.
- -To know the threats to the rainforest both on a local and global scale.
- -To know that fair trading is the process of ensuring workers are paid a fair price, have safe working conditions and are treated with respect and equality.
- -To know the UK grows food locally and imports food from other countries.

- -Describing and explaining how humans can impact the environment both positively and negatively, using examples.
- -To know the global population has grown significantly since the 1950s.
- -To know which factors are considered before people build settlements.
- -To know migration is the movement of people from one country to another.
- -To know that natural resources can be used to make energy.
- -To know some positive impacts of humans on the environment.
- -To know some negative impacts of humans on the environment.

Geographical Skills and Fieldwork

	Year 1/2	Year 3/4	Year 5/6
Question	-Asking questions about the world around themRecognising there are different ways to answer a question.	-Beginning to choose the best approach to answer an enquiry question.	-Developing their own enquiry questionsChoosing the best approach to answering an enquiry question.
Observe	-Commenting on and discussing the features they see in the area surrounding their school when on a walkAsking and answering simple questions about human and physical features of the area surrounding their school grounds.	-Mapping land use in a small local area using maps and plansMaking a plan for how they wish to collect data to answer an enquiry-based question, with the support of a teacherAsking and answering one- step and two-step geographical questionsObserving, recording, and naming geographical features in their local environments.	- Making sketch maps of areas studied including labels and keys where necessary Making an independent or collaborative plan of how they wish to collect data to answer an enquiry based question.
Measure	-Asking and answering simple questions about the features of their school and school groundsCollecting quantitative data through a small survey of the local area/school to answer an enquiry question.	-Using simple sampling techniques appropriatelyMaking digital audio recordings for a specific purposeDesigning a questionnaire / interviews to collect quantitative fieldwork data.	-Selecting appropriate methods for data collectionDesigning interviews/questionnaires to collect qualitative dataBeginning to use standard field sampling techniques appropriately.
Record	-Drawing some of the features they notice in their school and school grounds in correct relation to each other on a sketch mapClassifying the features they notice into human and physical with teacher supportTaking digital photographs of geographical features in the localityMaking digital audio recordings when interviewing someone.	-Taking digital photos and labelling or captioning themMaking annotated sketches, field drawings and freehand maps to record observations during fieldworkBeginning to use a simplified Likert Scale to record their judgements of environmental qualityUsing a questionnaire/interviews to collect qualitative fieldwork data.	-Using GIS (Geographical Information Systems) to plot data sets (e.g prevalence of crime in certain areas) onto base maps which can then be analysed. -Using a simplified Likert Scale to record their judgements of environmental quality. -Conducting interviews/questionnaires to collect qualitative data. -Interpreting and using real-time/live data. -To identify and mitigate potential risks during fieldwork.
Present	-Using a simple recording technique to express their feelings about a specific place and explaining why they like/dislike some of its featuresPresenting data in simple tally charts or pictograms and commenting on what the data showsAsking and answering simple questions about data.	-Presenting data using plans, freehand sketch maps, annotated drawings, graphs, presentations, writing and digital technologies when communicating geographical informationSuggesting different ways that a locality could be changed and improvedFinding answers to geographical questions through data collectionAnalysing and presenting quantitative data in charts and graphs.	-Deciding how to present data using plans, freehand sketch maps, annotated drawings, graphs, presentations, writing at length and digital technologies when communicating geographical information. -Drawing conclusions about an enquiry using findings from fieldwork to support your reasonings. -Evaluating evidence collected and suggesting ways to improve this. -Analysing quantitative data in pie charts, line graphs and graphs with two variables.

Voca 1/2	Voor 2/4	Voca 5/6
Year 1/2 -Using an atlas to locate the UK.	Year 3/4 -Beginning to use maps at more than one scale.	Year 5/6 -Confidently using and understanding maps at more than one
-Using a map to locate the four countries of the UK.	-Using atlases, maps, globes, satellite images and beginning to use	scale.
-Recognising why maps need a title.	digital mapping to locate countries studied .	-Using atlases, maps, globes and digital mapping to locate
-Using an atlas to locate the four capital cities of the UK.	-Using atlases, maps, globes and beginning to use digital mapping to	countries studied.
-Using a world map, globe and atlas to locate all the world's	recognise and describe physical features and human features in	-Using atlases, maps, globes and digital mapping to describe
seven continents.	countries studied .	and explain physical and human features in countries studied.
	-Using the scale bar on a map to estimate distances.	
-Using a world map, globe and atlas to locate the world's five	·	Identifying, analysing and asking questions about distributions
oceans.	-Finding countries and features of countries in an atlas using contents	and relationships between features using maps (e.g settlement
-Using directional language to describe the location of objects in	and index.	distribution).
the classroom and playground.	-Zooming in and out of a digital map.	-Using the scale bar on a map to calculate distances.
-Using directional language to describe features on a map in	-Beginning to use the key on an OS map to name and recognise key	-Recognising an increasing range of Ordnance Survey symbols
relation to other features (real or imaginary).	physical and human features in regions studied.	on maps and locating features using six-figure grid references.
-Responding to instructions using directional language to follow	-Accurately using 4-figure grid references to locate features on a map	-Recognising the difference between Ordnance Survey and other
routes.	in regions studied.	maps and when it is most appropriate to use each.
-Using locational language and the compass points (N, S, E, W) to	-Beginning to locate features using the 8 points of a compass.	-Beginning to use thematic maps to recognise and describe
describe the location of features on a map.	-Using a simple key on their own map to show an example of both	human and physical features studied.
-Using locational language and the compass points (N, S, E, W) to	physical and human features.	-Using models and maps to talk about contours and slopes.
describe the route on a map.	-Following a route on a map with some accuracy.	-Selecting a map for a specific purpose.
-Using locational language and the compass points (N, S, E, W) to	-Saying which directions are N, S, E, W on an OS map.	-Confidently using the key on an OS map to name and
plan a route in the playground or school grounds.	-Making and using a simple route on a map.	recognise key physical and human features in regions studied.
-Using a map to follow a prepared route.	-Labelling some features on an aerial photograph and then locating	-Accurately using 4 and 6-figure Grid References to locate
-Adding labels to sketch maps.	these on an OS map of the same locality and scale in regions studied.	features on a map in regions studied.
-Using simple picture maps and plans to move around the school.	-To understand that a scale shows how much smaller a map is	-Confidently locating features using the 8 points of a compass.
-Recognising landmarks of a city studied on aerial photographs	compared to real life.	-Following a short pre-prepared route on an OS map.
and plan perspectives.	-To recognise world maps as a flattened globe.	-Identifying the 8 compass points on an OS map.
-Recognising human features on aerial photographs and plan	-To know that an OS (Ordnance survey) map is used for personal use	-Planning a journey to another part of the world using six figure
perspectives.	and organisations use it for housing projects, planning the natural	grid references and the eight points of a compass.
-Recognising physical features on aerial photographs and plan	environment and public transport and for security purposes.	-To know that contours on a map show height and slope.
perspectives.	-To know that an OS map shows human and physical features as	-To know that qualitative data involves qualities,
-Drawing a map and using class agreed symbols to make a	symbols.	characteristics and is largely opinion based and subjective.
simple key.	-To know that grid references help us locate a particular square on a	-To know that GIS is a digital system that creates and manages
-Drawing a simple sketch map of the playground or school	map.	maps, used to support analysis for enquiries.
grounds using symbols to represent human and physical features.	-To know the eight points of a compass are north, south, east, west,	-To know that a pie chart can represent a fraction or

-Beginning to draw objects to scale (e.g show the school	-To know the main types of land use (agricultural, residential,	-To know a line graph can represent variables over time.
playground is smaller than the school or school field).	recreational, commercial, industrial and transportation)	-To be aware of some issues in the local area.
-Using an aerial photograph to draw a simple sketch map using	-To know an enquiry-based question has an open-ended answer found	-To know what a range of data collection methods look like.
basic symbols for a key.	by research.	-To know how to use a range of data collection methods.
Just of the field	37.5555.511	. 5 How to use a range of data concentrations.

- -To know that an aerial photograph is a photograph taken from the air above.
- -To know that atlases give information about the world and that a map tells us information about a place.
- -To know that a map is a picture of a place, usually drawn from above.
- -To know that symbols are often used on maps to represent features.
- -To know simple directional language (e.g near, far, up, down, left, right, forwards, backwards).
- -To know what a sketch map is.
- -To know that a globe is a spherical model of the Earth.
- -To begin to recognise world maps as a flattened globe.
- -To know that a compass is an instrument we can use to find which direction is north.
- -To know which direction is N, S, E, W on a map.
- -To know that maps need a title and purpose.
- -To know that maps need a key to explain what the symbols and colours represent.
- -To know that an interview can be a way to find out people's views about their area.
- -To know that a tally chart is a way of collecting data quickly.
- -To know that a pictogram is a chart that uses pictures to show data.

- -To know how to use various simple sampling techniques.
- -To know what a questionnaire and an interview are.
- -To know that quantitative data involves numerical facts and figures and is often objective.
- -To know that an annotated drawing or sketch map is hand drawn and gives a rough idea of features of an area without having to be completely accurate.
- -To know a Likert scale is used to record people's feelings and attitudes.
- -To know that qualitative data involves opinions, thoughts and feelings and is often subjective.
- -To know what a bar chart, pictogram and table are and when to use which one best to represent data.
